The Varley Red Top Battery Range offers very high performance for race and rally applications. Designed and engineered to a high specification for motorsport use, the Varley Red Top can withstand even the harshest of conditions. With high shock and vibration resistance, the Varley Red Top batteries have proven to be an excellent choice for race and rally cars. Small, lightweight, maintenance free and with an exceptionally high discharge capability, these batteries can be fitted upright or on their side. The use of absorbed glass mat technology means that there is a minimal risk of electrolyte leakage if the case is damaged. Furthermore, the inclusion of female terminals on all but the Varley Red Top 60 avoids the problem of broken terminals often encountered with male (stud) terminals.
