FLIES TO THE CINEMA

OMP STARS ON THE BIG SCREEN IN "RUSH", THE "ORIGINAL" SUITS OF JAMES HUNT AND NIKI LAUDA, WORN IN THE MOVIE RUSH, THE LASTEST WORK OF OSCAR-WINNING® DIRECTOR RON HOWARD

Rush was filmed in the United Kingdom, Germany and Austria and was released worldwide to the public in September 2013. An important feature film that goes thru the day to day world of the Formula 1 Racing, sign of the historicity and technical reputation of our brand which is ready to celebrate with RUSH the forty years of Motorsport.

OMP was chosen because is the only company in the world that can boast of a complete line of products and accessories dedicated to vintage racing styles, the result of the experience and know-how that the company has accrued alongside some of the greatest champions who have written the history of automobile racing. In order to create the products used in the film, OMP paid particular attention to details and stylistic aspects while researching thoroughly historic documents and archives.

The result was a reproduction as faithful as possible of the clothing worn by drivers at the time, those who were the protagonists of epic challenges on the most prestigious tracks in the world.

Special attention was paid to the colors to faithfully reproduce the period correct racing suits and safety equipment used by the teams' drivers in the '70s, OMP's attention to detail is evident in some of the features reproduced on the racing suits worn in the film, including the name and the logos of the various period sponsors.

All those details that were (and still are) embroidered by the craftsmen at OMP's manufacturing headquarters.

WE ARE THEREFORE PROUD TO SHARE WITH YOU THE SATISFACTION THAT SHOWS THE DEDICATION AND PASSION THAT EVERY DAY WE DEVOTE TO MOTORSPORTS FOR OVER FORTY YEARS

FOCUS ON

DRY SYSTEM

To help drivers reduce body temperature and improve their performance, OMP has designed a range of underwear and breathable clothing.

The OMP ONE line and TECNICA EVO breathable racing suits and underwear to facilitate the body thermoregulation, thanks to the innovative weave of the inserts, strategically positioned, that allow for high breathability while still maintaining their own fire-retardant properties (according to the FIA standard 8856-2000).

TECNICA EVO racing suits have breathable inserts, which have been increased to offer more comfort.

The cooling effect of the inserts is improved when worn with the OMP ONE breathable underwear that now offers a cooling spray solution.

OMP's Dry System is a registered utility model.

Back detail

INVIGORATING COOLING EFFECT

PC02003

OMP INVIGORATING COOLING EFFECT

OMP's aim was to create active underwear it has been achieved with the new OMP Invigorating Cooling Effect System.

Sleeping molecules inserted in the fabric fibers are activated by the spray that gradually release active principles that produce an invigorating cooling effect.

This reaction occurs by transdermal delivery.

The OMP underwear interacts with the organism through the skin.

The fabric fibers in contact with the body through the molecules start an osmotic exchange that transfers the active principles and produce the Invigorating Cooling Effect.

Bio-Nanotech Active System
Best Comfort
Active Thermoregulator
Cooling Sensation
Controlled Perspiration
Limited Condensation

BIO COSMETIC ITEM ACTIVE THERMOREGULATOR

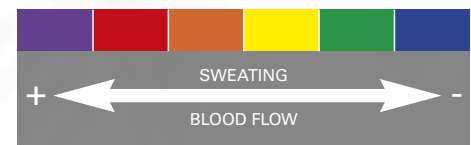

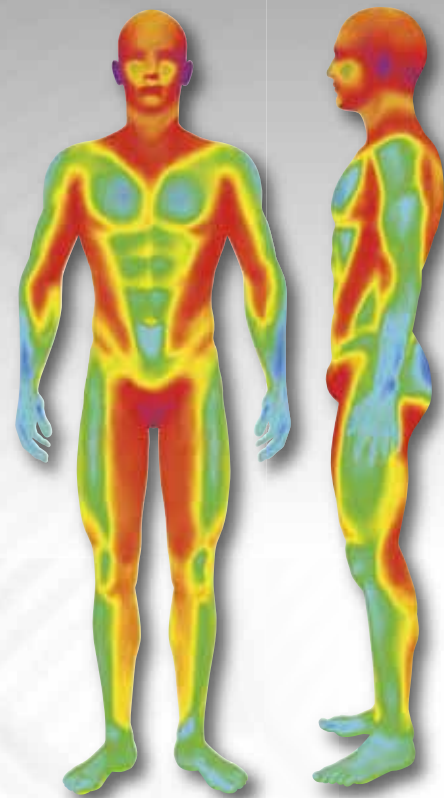

Reduces the high temperatures inside the cockpits, controls perspiration and keeps a steady body temperature, offering an invigorating and cooling sensation.

The treatment does not activate on the 2013 ONE underwear line.

Very often drivers run into situations in which the regulation of body temperature is compromised and the risk of hyperthermia is very high. The increase in body temperature increases the feeling of fatigue, dramatically reduces performance and potentially can lead to circumstances which increase the risk of accidents. Body areas subject to a greater perspiration are: underarm, brachial, back, lumbar, front tibial and popliteal areas.

The OMP INVIGORATING COOLING EFFECT sprayed on the ONE 2014 underwear line (a part from on the socks) facilitate the body thermoregulation, thanks to the research which has always distinguished OMP. OMP gives always particular attention to the wellness and comfort of the pilots all over the world.

ORDERS-RETURNED ITEMS DELIVERY TIMES

Orders must be submitted in written form. OMP is not responsible for delayed deliveries and will not pay for consequent damages. All returned goods must be authorized by OMP, sent freight pre-paid and accompanied by regular invoice. OMP will charge all costs for possible damages suffered by returned goods during transport or for missing parts. Defective goods or broken items returned to OMP after use, will be repaired and sent back to buyer. It will not be possible to replace such goods with new items under any circumstances. Damages suffered by goods during transport even if carrier is chosen by OMP, are always at the receiver's charge.

CARE INSTRUCTIONS:

Read the labels on the products and user's manuals before using each item. Strictly follow usage and maintenance instructions provided in the manuals and/or on the labels.
Failure to do so may reduce the effectiveness of the items and result in an increased risk of serious or fatal injuries in the event of a crash or a fire. Improper use or maintenance voids the warranty and relieves OMP Racing of all responsibility towards the user.

WARNING

Motorsport is an intrinsically dangerous activity that can result in serious or fatal injuries. The items presented in this catalogue provide protection for a specific body part for a limited period of time in controlled test conditions, according to the FIA standard specified on each item label. No device can provide total protection against potential injuries in the event of a collision or a fire. To avoid these risks, do not engage in motorsports.

OMP products are sold without warranty expressed or implied. No warranty or representation is made as to any product's ability to protect the user from any injury or death. The user, upon use of these products agrees to hold manufacturer, distributor, and their respective owners employees, agents and representatives harmless. It is the user's responsibility to become familiar with all available information concerning the correct use, care and limitations of these products. If you are uncertain of the correct use or limitations of the products, do not use them. The manufacturer, the distributor and their respective owners, employees, agents and representatives are not responsible or liable for errors or omissions.

WARNING DISCLAIMER

- Personal safety products are only part of a complete safety system that includes the vehicle, the race track and the prevailing conditions at the time of use.
- Personal safety products are not designed to provide the same level of performance or protection throughout the particular product. Different parts or areas of a product may provide less protection even though they may appear the same.
- Personal safety products need to be inspected before each use and should be replaced after any evidence of wear, exposure to chemicals, excessive heat or any unusual condition.
- Products are sold for the exclusive use in officially sanctioned auto racing events and are not intended to be installed and used for regular street use which products are subject to different homologation and laws depending on your country of residence.
- It is the user's responsibility to become familiar with all available information concerning the correct use, care and limitation of these products.
- Every single change or customizing on our products and/or every single operation on them can reduce their safeness. The user responds therefore on his own exclusive risk and responsibility for any modify or customizing or any other operation on our products.

BY USE OF THESE PRODUCTS, THE USER ACKNOWLEDGES:

That personal safety products are only part of a complete safety system that includes the vehicle, the race track and the prevailing conditions at the time of use. That personal safety products are not designed to provide the same level of performance or protection throughout the particular product. Different parts or areas of a product may provide less protection even though they may appear the same. That personal safety products need to be inspected before each use and should be replaced after any evidence of wear, exposure to chemicals, excessive heat or any unusual condition. Helmet is designed to reduce the risk of head and facial injuries on impact only. No helmet can protect wearer against all possible or foreseeable impacts. Helmet is not recommended, marketed and sold for high-risk jobs such as refuelers. Additional information is available online at www.ompracing.it and www.ompamerica.com
